

How did early career scientists contribute to NZ's COVID-19 response?

Prof Shaun Hendy was on the New Year's honours list for orchestrating modelling and analysis that's helped keep New Zealand safe from Covid-19. He didn't do it alone. Join a discussion in our webinar: Shaun will host four of the early career researchers (ECRs) who worked in the effort. What did they do, and what lessons does their success hold for valuing the role of ECRs in our research system?

This is the first of a series of New Zealand Association of Scientists Webinars in an interactive webinar format. We're calling them Town Halls, because they're a chance for NZ Science to come together and discuss how we do science.

Who: Join Prof Shaun Hendy with ECRs:

- Kannan Ridings, University of Auckland
- Audrey Lustig, Manaaki Whenua
- Anastasiya Kiddle, University of Auckland
- Nicholas Steyn, University of Canterbury/Auckland

When: 12:15 – 1:00 pm, Friday 5th Feb 2021

Where: Via Zoom

About the NZAS

The New Zealand Association of Scientists (NZAS)

NZAS is an independent body that stands for and advocates for science and scientists in New Zealand, with an interest in science policy, history, education, and communication. The Association represents a wide cross-section of the New Zealand science community, from Universities and Crown Research Institutes, to independent research organisations, government, and consultancy. Join us at scientists.org.nz.
